Ecore Athletic: Stacked

The Stacked family of products represents Ecore's answer to "Can a floor do more in strength and conditioning environments?". Benefitting from our patented itstru technology, Stacked products feature a unique wear layer laminated to a performance rubber backing. The result is a new generation of surfaces that not only provide the basic attributes that every floor should have, but also more.

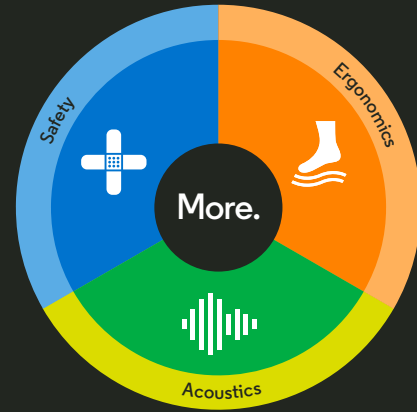

What does it take to be a floor?

All Ecore products must provide the basic attributes of a floor.

- Durability
- Sustainability
- Ease of Installation
- Ease of Maintenance
- Slip Resistance

Can a floor do more?

In addition to those basic attributes, Ecore Athletic Stacked products offer MORE. Harnessing the power of itstru technology, these surfaces provide enhanced force reduction with balanced energy restitution that maximizes safety, ergonomics and acoustics for the athlete in all of us.

Speed & Agility Turf

This flooring features a dense, textured nylon surface fusion bonded to a 5mm or 12mm base layer. While too abrasive to fall or dive on, Speed & Agility Turf offers a consistent and tight surface that is ideal for footwork drills and sled work. The 5mm backed version coordinates with 8mm rubber products and can withstand light to moderate free weights.

(3mm +5mm)

The 12mm backed version simulates pristine, natural turf conditions, while coordinating with Ecore Athletic's thicker rubber products like Performance Rally. This thicker version of Turf is also available in 23-inch by 46-inch tiles that create a portable/temporary turf system. Available with interlocking transition pieces, this surface combines extreme performance with ease of installation and total portability.

ecore™

Athletic

The Stacked family of products is part of Ecore Athletic, a business unit under Ecore International. Since 1871, Ecore has been transforming reclaimed waste into unique surfaces that make people's lives better. What started with simple cork closures has evolved into a diverse portfolio of products solving complex problems in applications ranging from playgrounds, weight rooms, and turf fields to hospitals, hotels, and retail environments. We are driven everyday by a simple question, "Can a floor do more?" At Ecore, we believe the answer is "YES." We are building

our company and the products we offer based on the simple notion that floors should elevate beyond current expectations. Our energy is focused on the interaction between people and the surface. We engineer performance well beyond industry standards related to acoustics, ergonomics, and safety. Harvesting the unique power from a myriad of waste streams, Ecore creates products that align—substantial force reduction with a balanced amount of energy return to create dynamic surfaces that are catered to the individual and the application.

Players will fall... we will be there to catch them!
Athletes will over train... we will keep them going!
Deadlifts will sound like thunder... we will quiet the noise!
